

How to Transfer Account to New Website

Visit the website for your property. The domain name is “digital6hosting.com”. Sub-domain varies depending on property. Login with your username and password. Click “Login” to enter your account.

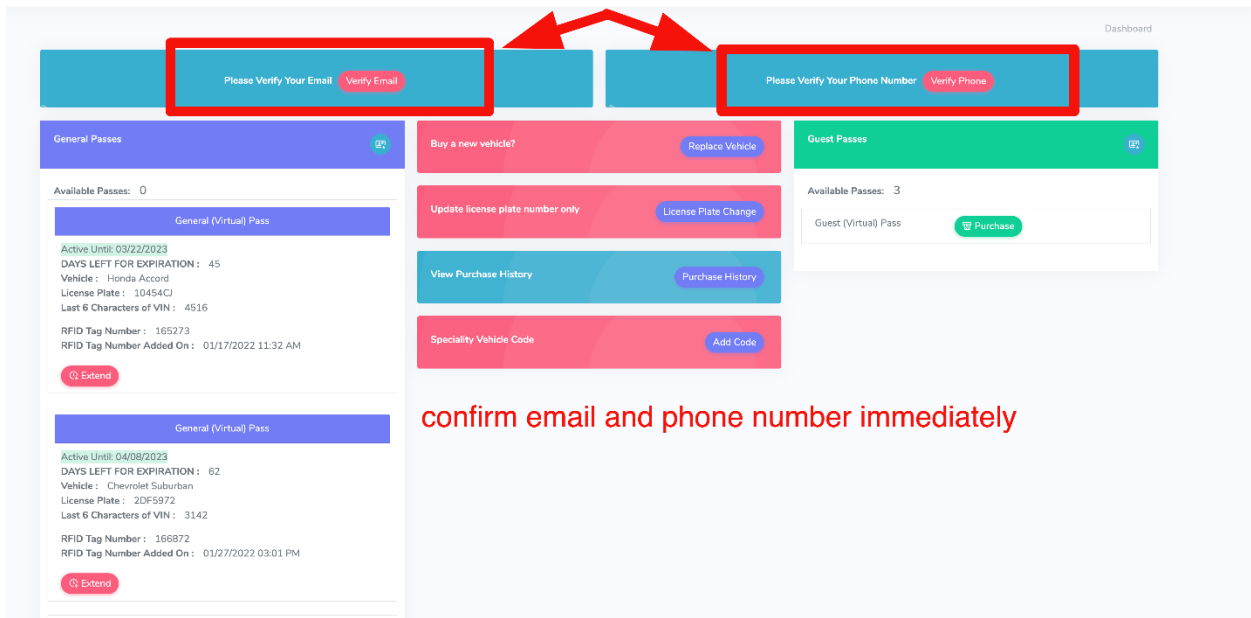

The first page will display a textbox asking you to provide your email address. You are able to update your email address at this time, if needed. Please note that your new username will be your email address.

You must select your address from the drop-down menus and create a new password.

The screenshot shows a user profile update form. At the top, it says "Welcome, Jose Alvarado De Leon" and "Update your details to proceed." Below this is a light blue box with instructions: "Your new username will be your email address shown below. If you wish to use a different email then please change it to your current email address." The form includes an "Email" field with "antonioscor13@gmail.com". There are two dropdown menus: "Select Your Address *" and "Unit Number *", both containing "-- Select Your Address --" and "-- Select Your Unit --" respectively. Below these are "Password:" and "Password Confirmation:" fields, both with "Enter your password..." and a red "x" icon. A "Confirm" section has a checkbox for "My Address and Unit # is correct." and a red note "Passwords must meet the requirements". A blue "Update" button is at the bottom.

Your password must be at least eight characters long, including at least one uppercase letter, lowercase letter, number, and symbol. You must confirm your address by clicking the checkbox next to “My Address and Unit # is correct”. Click “Update” to proceed.

Once you are logged into your account, you should be able to view your active permits and guest passes. Only active passes will be transferred over. Please verify your email and phone number immediately.
